

Makes it easy to get the pills out

This seemingly simple device helps thousands of patients to take their medications safely and easily.

- Small and lightweight so it fits comfortably in your hand
- Suitable for aged care staff, self-medicating residents or community patient users.
- Assists patients who suffer from poor eyesight, arthritis or have limited dexterity
- Made of durable plastic so it is easy to clean
- Center tip with cup design prevents spillage of tablets

To use, insert the tip of the Pil-Bob into the blister compartment through the foil backing. Sweep it around the edge, allowing the medication to fall from the blister into the cup.

\$3.25 / PIL-BOB
